

## GGG Straw Log

GGG Straw Sediment Control Log is composed of 100% clean, certified weed free straw fiber matrix confined by a synthetic net to form a log of a specific diameter. GGG Straw Logs are designed to reduce hydraulic energy and filter sediment laden flow in channels and on slopes. The logs are flexible to conform to the soil surface and are secured by staking. GGG Straw Logs meet or exceed the physical property values listed below:

| <b>Diameter</b> | <b>Per 10 Ft Length</b>                  |
|-----------------|--|
| 9 inch          | 14.0 lbs<br>1.4 lbs/ft<br>3.3 lbs. cu ft |
| 12 inch         | 25.0 lbs<br>2.5 lbs/ft<br>3.3 lbs/cu ft  |
| 20 inch         | 50.0 lbs<br>5.0 lbs/ft<br>2.4 lbs/cu ft  |

| <b>Composition and Netting</b> |                                       |
|--------------------------------|---------------------------------------|
| Fiber Composition              | 100% Clean, Certified Weed Free Straw |
| End Closure                    | Hog Ring or Tied                      |
| Netting                        | 0.50" X 0.50" Heavy Duty Synthetic    |
| Configuration                  | Cylindrical with Closed Ends          |
