

Gro-Green Wood Fiber Blend

Gro-Green Wood Fiber Mulch is manufactured from 70% virgin hardwood chips blended with 30% high quality post consumer recycled cellulose fiber. Our hydromulch has excellent color retention (green dye), consistency and coverage characteristics. Gro-Green Wood Fiber Blend delivers increased performance and erosion control by strongly bonding seed, fiber and soil together, a perfect choice for residential, commercial and DOT applications. Available with Tackifier.

Rate	Slope
