

Gro-Green Wood Fiber Mulch With Tackifier

Gro-Green Wood Fiber Mulch is manufactured from 100% virgin hardwood chips-the finest contaminant free fibers available. Our hydromulch has excellent color retention (green dye), consistency and coverage characteristics. Gro-Green Wood Fiber Mulch delivers increased performance and erosion control by strongly bonding seed, fiber and soil together, a perfect choice for residential, commercial and DOT applications. Contains GGS Easy Tackifier. Our Tackifier is specifically formulated polymer that binds hydromulch fibers to the soil. GGS Easy Tackifier should reduce the friction of the slurry in your hose and tank and may improve your shooting distance. GGS Easy Tackifier is designed to increase water holding capacity and improve seed germination.

Rate	Slope
1500 lbs/Acre	Moderate
2000 lbs/Acre	3:1 to 2:1
2500 lbs/Acre	Greater than 2:1

Moisture Content	12% (+/-3%)
Toxicity	Non-Toxic
Water Holding Capacity	1200% Minimum
